Lumber is Down

Yes, Lumber Is Down-Down to where a farmer can afford to build anything that can be made of lumber even in the face of a low market on farm products. Lumber Was The Last Great Commodity To Go Up and the first to come down. Today lumber prices are down to where it is hard to see how they can go any

lower when costs are considered. You Farmers Have Reason To Be Disappointed In the returns from last year's crops, but with lumber selling on the present basis we don't believe you can afford not to do whatever building or repairing may be necessary before Spring work commences.

Whether It's a Barn, or a Shed, or Just Some boards for fixing up around the place, the facts about lumber will appeal to any man or woman who believes in thrift
